

Venues (0.2.9)

License: [RUCKUS Cloud Privacy Policy](#)

[Ruckus Network Technical Documents](#)

Overview

A venue is a physical location in Ruckus Cloud where you deploy and manage networking devices such as access points and switches. A venue can range from a small room to a large multistory building and includes address information to identify its physical location. Each venue can contain multiple networking devices, but each AP or switch belongs to only one venue.

Venue

Manage venue.

Access Venues Deprecated

Get venue list. This method will be removed no sooner than 08/31/2026.
